

A high strength, high conductivity aluminum connector for joining a cable main parallel to a cable tap, the Type EHV PCA includes clamping hardware made of high tensile aluminum for dependability and durability in the field. To facilitate installation and to aid in a corona free performance, all bolt heads are captivated. When placing an order provide the specific conductor size. Example: 110-123-EHV(3500AAC)

* Specify specific conductor size.

BOLTED EHV PARALLEL CONNECTORS, CABLE TO CABLE					
CATALOG NUMBER	DIMENSIONS IN INCHES				
	AAC	ACSR	DIA.	A	B
