

The type EHV ASB2 is designed for corona free performance at 500KV. It features corrosion resistant clamping hardware, made of high tensile aluminum, and comes with recessed bolt heads for single wrench installation.

These connectors come with steel galvanized bolts and lockwashers for mounting to the insulator cap. The eight holes in the base of the bus support permit rotation and angular adjustment.

For a 7" bolt circle, add the descriptor "7BC" into the product number.

**Example:** 19-404-2C-12-7BC-EHV (2000AAC).

\*Specify specific conductor size.
