

Cast of a lightweight and corrosion resistant aluminum alloy, the type EHV WBSH features eight holes for rotation and angular adjustment. Steel galvanized bolts and lock-washers are included for mounting to the insulator cap.

Designed for rigid fit, the bus supports are capable of providing corona free performance at 345KV through 500KV. Static eliminator springs come standard.

For a 7" bolt circle, add the descriptor "7BC" into the product number.

**Example:** 19-1244-SAD-7BC-EHV.

WELDED EHV OPEN BASE SADDLE BUS SUPPORT				
CATALOG NUMBER	PIPE IPS	BOLT CIRCLE	DIMENSIONS IN INCHES
