18-368	4	3/4	1	2 1/4
18-369	4	1	1 1/4	2 1/2

For joining a pipe main to taps whose angles vary from the perpendicular, the Type TTWV offers economy and performance. Cast of a high conductivity, lightweight, and corrosion-resistant aluminum alloy, it can be used in self-supporting A-frame structures.

To insure maximum efficiency in filling the order, the varying angles should be designated by means of a suffix added to the catalog number. A 15 deg angle tap for catalog number 18-322, for example, should be ordered as 18-322-15.
